-----------------	-------------	----	-------------------	--------	--------------	------	----------	----------	-----------	------------	-----------	------------------------	-------

Please request our free projector guide at www.lcdprojectors.co.uk for full information on choosing projectors for business and education. Wedgwood do not supply projectors to home users. A summary of projector terms is given below:

ANSI lumens - This is a measure of how bright a projector is as defined by the American National Standards Institute (ANSI). A brightness of 1,200 is generally fine for small rooms with the lights on. 2,000 and above recommended for larger rooms.

KG - The weight in kilograms. For travelling sales people/teachers/presenters, look for projectors under 4kg.

Native resolution - For computer use, look for an XGA (1024x768 pixels) or a higher resolution projector to give good quality computer images..

Pixels - The dots that make up an image. The more pixels, the better the quality and detail of the image shown.

Aspect ratio - This is just techie speak for the image shape. A widescreen image is called 16:9 and a normal computer monitor or TV image is 4:3.

Technology - Projectors use either LCD, DLP or LCoS chips to produce the projectors image. LCD gives excellent computer images and DLP gives excellent video images. LCoS is the newest technology which gives the best computer images and also excellent video ones.

Warranty - The projectors warranty which does NOT include the lamp. Lamp warranties are usually 1 or 3 months depending on manufacturer.

Noise dB - The volume of the projectors cooling fan in decibels.

HD ready - Whether a projector can display High Definition TV and video images. To be HD ready a projector needs to be widescreen (16:9), have at least 720 lines and have either a DVI or HDMI port for connection to HD devices such as Sky HD digital satellite receiver boxes.

Lamp life - The average life of a projector lamp in hours. Replacement projector lamps cost around £300+VAT.

Contrast ratio - Projectors project light onto a screen so projecting the colour black is difficult as it comes out as a dark grey. The higher the contrast ratio figure the better the projected black. DLP projectors have the highest contrast ratios and are therefore excellent at projecting video images.

Wireless - Doesn't require a cable between the projector and the computer. The computers image is sent wirelessly to the projector. An optional card may need to be purchased for this to work.

UK delivery charge £20+VAT on all multimedia projectors. All prices are excluding VAT. E. & O.E.
All prices are subject to our standard terms and conditions and may change without prior notice.
